Bubble Massage

BubbleMassage™ air bath hydrotherapy is designed to deliver a holistic, full-body experience. Warm air is pushed through the 360-degree staggered airjet design, creating thousands of bubbles. Your entire body is thoroughly massaged, while the random motion of bubbles traveling along your body to the surface helps center and clear your mind. And, you can tailor the intensity of each bathing experience, from a soothing caress to a vigorous massage.

Bubbles completely surround and massage the body at your preferred level of intensity, helping to center the mind and stimulate the release of muscle tension. Depending on the choice of airflow setting, the experience is anything from a gentle bubble action to an energizing massage.
